

IT Helpdesk and Technical Support Guide

Overview

The IT Helpdesk provides technical assistance to all employees for software, hardware, network, and access-related issues. New joiners are encouraged to contact the IT Helpdesk whenever they face technical difficulties during onboarding.

Required Software Installation

All new joiners should install the following applications on their workstations:

Development Tools

- Java Development Kit (JDK) 17 or higher
- Visual Studio Code
- IntelliJ IDEA
- Git
- Node.js Version 18 or higher
- Maven
- Docker Desktop

Productivity Tools

- Microsoft Outlook
- Microsoft Teams
- Microsoft Edge Browser

Testing and API Tools

- Postman
- Swagger UI (Project Access)

Security Tools

- VPN Client
- Endpoint Security Software

All approved software can be downloaded through the Software Center.

Software Center Access

To install approved software:

1. Open the Start Menu.
2. Search for **Software Center**.
3. Launch the Software Center application.
4. Browse available applications.
5. Select the required software.
6. Click **Install**.
7. Wait for installation completion.

Some software may require manager approval before installation.

Company Email Setup

Your company email account is created before your joining date.

Email Access Steps

1. Open Microsoft Outlook.
2. Enter your company email address.
3. Enter your temporary password.
4. Complete multi-factor authentication if prompted.
5. Change your password during first login.

All official communication must be performed using the company email account.

Microsoft Teams Setup

Microsoft Teams is the primary communication platform used for chats, meetings, and collaboration.

Setup Instructions

1. Open Microsoft Teams.
2. Sign in using your company email account.
3. Complete authentication.
4. Join assigned project or department teams.

5. Configure notifications as needed.

Teams can be accessed from desktop, mobile, and web browsers.

VPN Configuration

VPN access is required to connect securely to company resources while working remotely.

VPN Setup

1. Install the approved VPN client.
2. Open the VPN application.
3. Enter company credentials.
4. Complete authentication.
5. Connect to the corporate network.

Ensure the VPN is connected before accessing internal applications.

Password Reset Process

If you forget your password:

1. Navigate to the Password Reset Portal.
2. Enter your company email address.
3. Verify your identity.
4. Create a new password.
5. Sign in using the updated password.

For assistance, contact the IT Helpdesk.

Common Technical Issues

Unable to Login

Possible causes:

- Incorrect password
- Account locked

- Network connectivity issue

Solution:

- Reset password
 - Contact IT Helpdesk
